

Power BI HR Attrition Dashboard

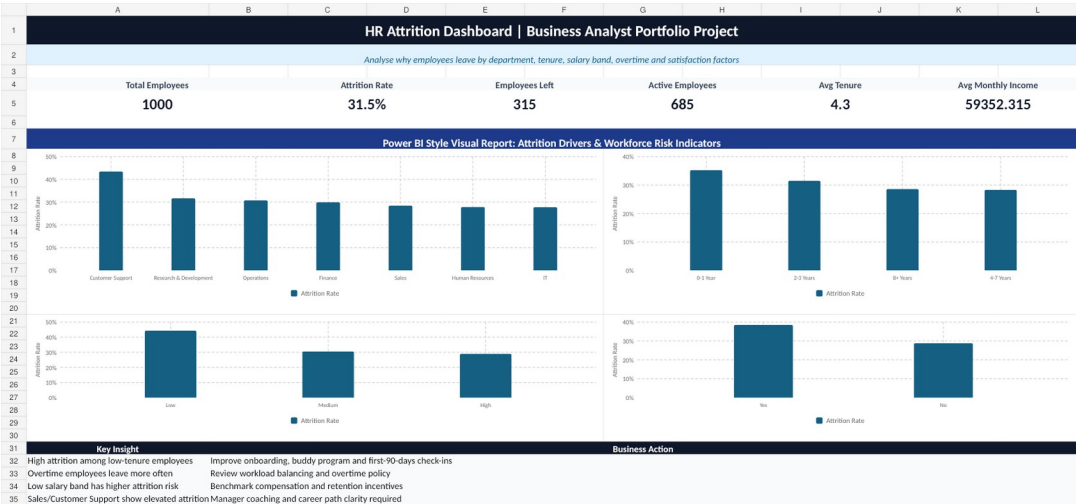

Business Analyst Case Study | People Analytics | Attrition Insights

Business Problem

Employee attrition impacts hiring cost, productivity, team stability and employee morale.

HR leadership needs a visual dashboard to answer:

- Which departments have the highest attrition?
- Are new employees leaving faster?
- Does overtime increase attrition risk?
- Is salary band connected to employee exits?
- What actions should HR prioritize?

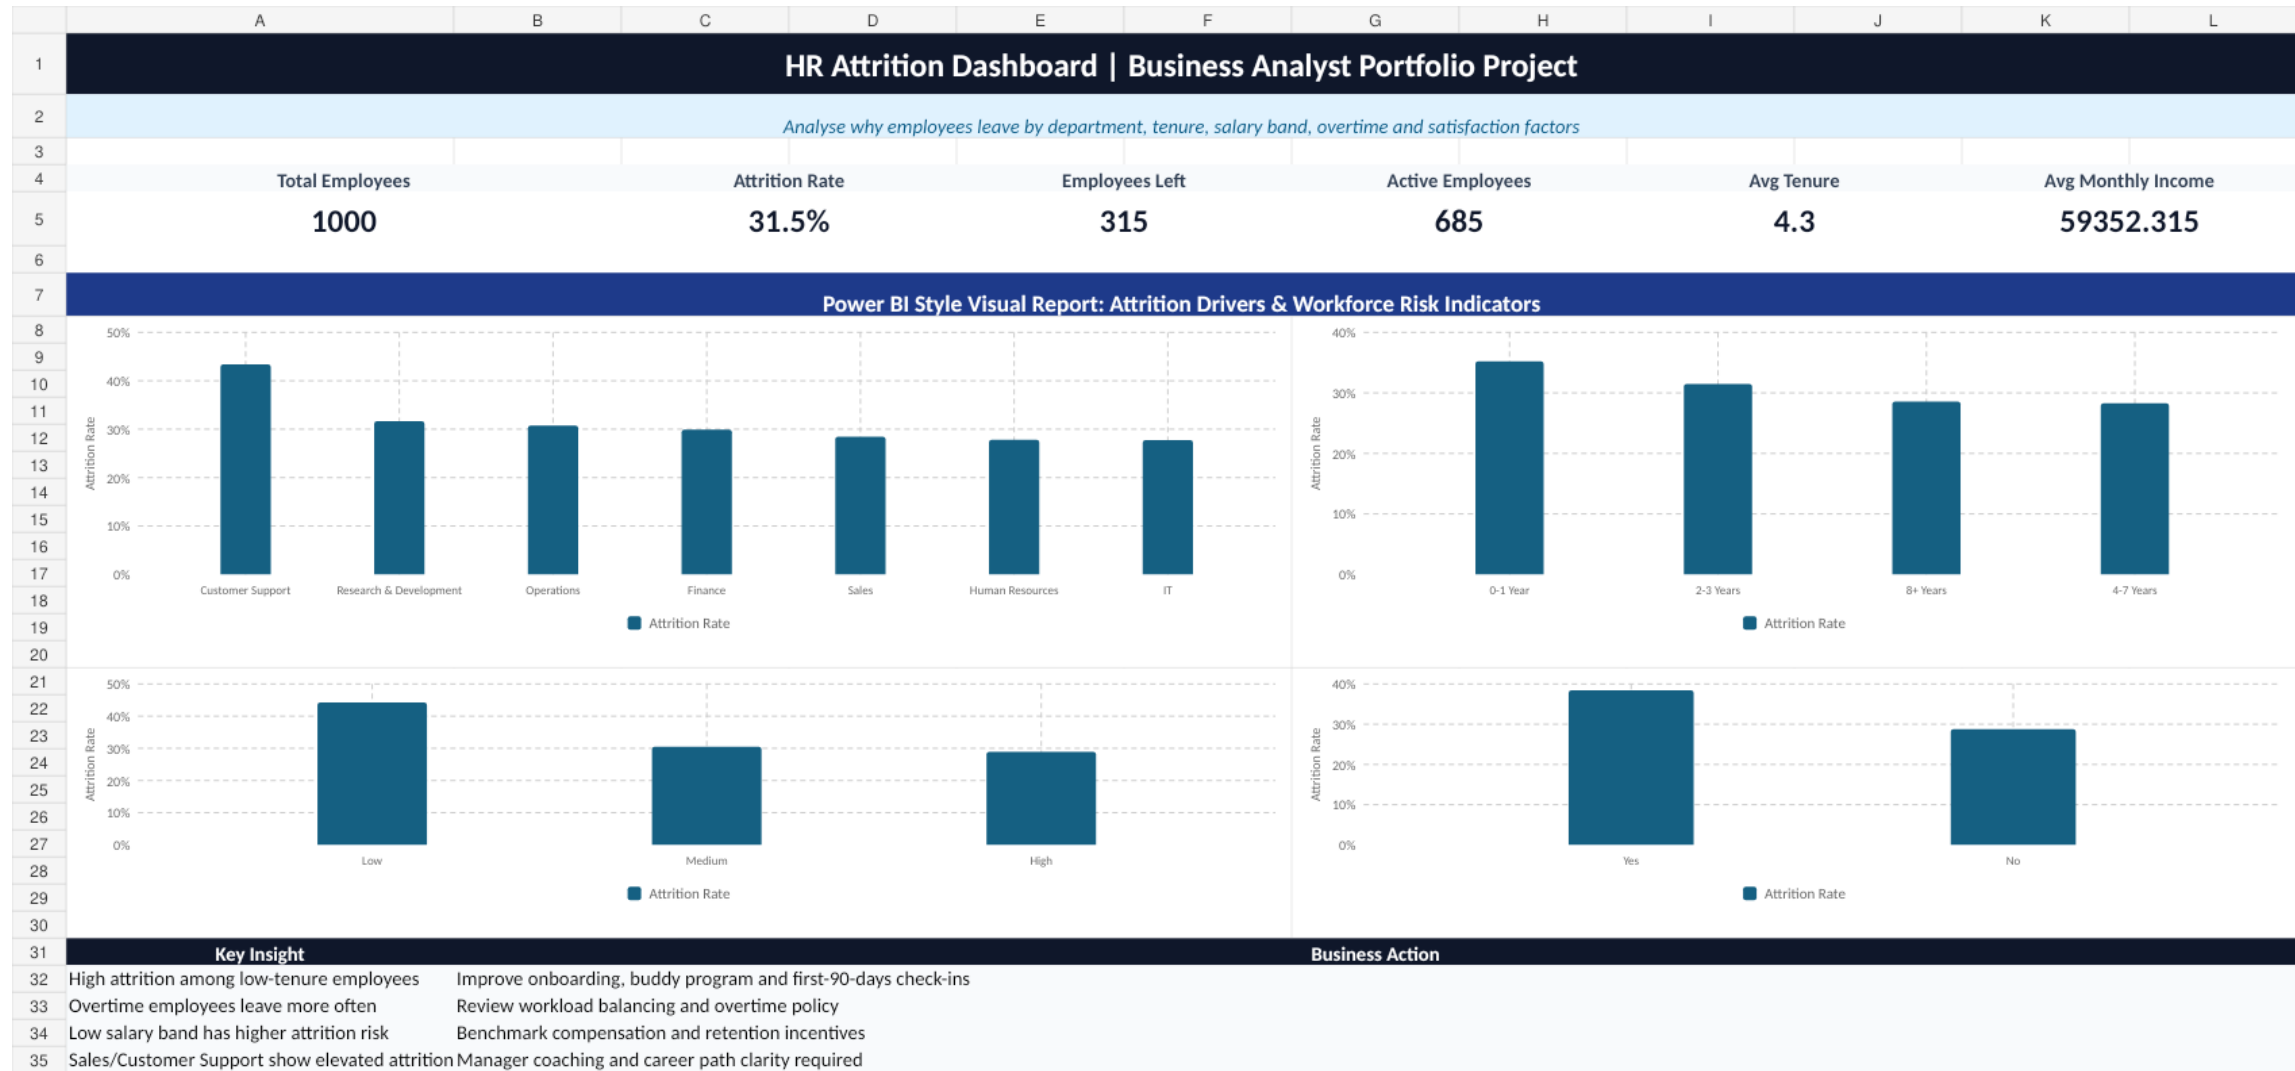

Key HR Attrition KPIs

Executive summary metrics for HR leadership

Power BI HR Attrition Dashboard | Business Analyst Portfolio Project

Segmentation Analysis

Attrition segmented by department, tenure, salary band and overtime

Dashboard segments attrition by:

- Department: Identify business units with high workforce risk
- Tenure Band: Detect early-tenure exits and onboarding gaps
- Salary Band: Understand compensation-related attrition exposure
- Overtime: Evaluate workload and burnout indicators
- Job Role: Highlight roles needing immediate intervention

Department	Employees	Left	Attr %
Customer Support	129	56	43.4%
Research & Development	259	82	31.7%
Operations	117	36	30.8%
Finance	97	29	29.9%
Sales	218	62	28.4%

Key Business Insights

What the HR team should notice

1. Early-tenure employees show higher attrition risk.
2. Overtime is strongly connected with employee exits.
3. Low salary band employees have higher attrition exposure.
4. Attrition is concentrated in selected departments and job roles.
5. Retention actions should focus on onboarding, workload and compensation.

Business Recommendations

HR actions based on dashboard insights

- ✓ Create a 30-60-90 day onboarding and engagement check-in process.
- ✓ Monitor overtime by department and rebalance workload where required.
- ✓ Review salary bands for high-risk employee groups.
- ✓ Run stay interviews for employees with tenure below 2 years.
- ✓ Prepare department-level retention action plans and track progress monthly.

BA Deliverables & Portfolio Value

Artifacts included for GitHub and LinkedIn

- Dataset CSV
- Dashboard Workbook
- BRD Document
- User Stories
- Insights & Recommendations
- SQL Analysis Queries
- Dashboard Preview Image
- SRS Document
- KPI Definitions
- LinkedIn Caption

How to Share This Project

Recommended LinkedIn + GitHub presentation

LinkedIn Post:

- Upload dashboard image as the first visual
- Attach PPT/PDF as a carousel
- Add GitHub link in the first comment

GitHub Repository:

- README.md with project objective, KPIs and insights
- data/ folder for CSV
- sql/ folder for queries
- dashboard/ folder for workbook
- documentation/ folder for BA documents
- presentation/ folder for PPT/PDF
